DCI/IC-73-0217

5 April 1973

MEMORANDUM FOR: Members of SIGINT Committee Ad Hoc Group
for Development of Assessment Methods

SUBJECT : Minutes of the Seventeenth Meeting,
5 April 1973

1. Attendees were:

25X1 [redacted] NSA
Mrs. Joan Downs, State
Mr. Robert DuBois, USAF
Mr. J. Francis, AFSP
CDR Jerome Galinsky, Navy

25X1 [redacted]
Dr. Robert A. Porter

25X1

25X1

25X1 2. [redacted] had prepared descriptions and instructions
for ELINT EOB and Technical intelligence. None of the other
submissions which were to be submitted were complete and as a
consequence consideration of these will be postponed until
the next meeting.

3. In the Telemetry scoring sheets it was agreed to
use a definition of a "Telemetry Event" which is common in
the community--namely, one in which several events can be
associated with a single launch. This applies principally
to ESV's. For such launches, accordingly, more than one
report sheet may be needed.

4. Members of the working group were asked to prepare
independently estimates of the relative importance weights
of the several SIGINT sensor types. These will provide a
measure of the agreement or disagreement from several points
of view, and especially serve as a basis for the suggested
sheets to be submitted to the SIGINT committee.

[redacted]
CHAIRMAN

25X1
